About me

AI Solutions Architect and Automation Lead with 20+ years in IT, spanning embedded C++, infrastructure, enterprise Java, and applied LLM systems. I take AI solutions from process audit to production: agents, MCP integrations, RAG, evaluation, human-in-the-loop controls, and CI/CD.

Key Achievements

- 20+ years in IT across embedded development, infrastructure, enterprise backend, and applied AI
- 10+ years in Java development, technical leadership, and architecture; led teams of 20+ engineers
- Evolved a back-office platform serving 15,000+ stores and helped decompose a ~12,000-class legacy monolith
- Reduced an enterprise build pipeline from 1.5 hours to 30 minutes
- 2+ years designing and deploying LLM agents, including code review and acceptance workflows integrated with CI/CD
- Founder and mentor of the non-commercial AI practitioner community “Hello, Neural Network?”

Experience

Self-Employed — AI Solutions Architect / Automation Engineer 2023 — Present

- Design and deploy production agentic systems for enterprise clients, from process audit and prototype through rollout and team handoff
- Build agent pipelines, RAG systems, and custom MCP servers over internal APIs and enterprise data
- Integrate evaluations, LLM-as-judge, human-in-the-loop controls, observability, and CI/CD
- Work with clients across LATAM, Israel, and international SaaS projects; selected case details are protected by NDA
